Job Description

Essential Job Duties

Steel Warehouse has an exciting position for a Maintenance Supervisor.

- Must be able to work third shift and overtime as required.
- Provide technical support for both electrical and mechanical concerns.
- Delegate assignments for timely and efficient completion of equipment repairs.
- Ensure maintenance staff is fully trained in complex maintenance techniques and standard operating procedures.
- Performs hands on industrial maintenance.

Qualifications

- Ability to understand complex written and oral instructions.
- Demonstrated knowledge in repairs of large industrial equipment.
- Communicates the “sense of urgency” for the proper and timely maintenance of all equipment to subordinate and management personnel.
- Ability to organize and prioritize multiple tasks.

Education

High School Diploma or GED equivalent is required plus **five** years’ experience performing installation, repair, and maintenance of mechanical equipment in an industrial setting, including **three** years of supervisory responsibilities. Or an Associates’ Degree in Electrical, Manufacturing, or Mechanical Engineering, or a related field, along with a minimum **three** years’ of supervisory responsibilities.
